Scroll compressor is the most advanced technology in the car. Compared with the traditional piston compressor, it has no oil leakage risk, causing the vehicle on fire, brake failure, aging components, seriously endangering the safety of passengers. The new ASF series oil-free scroll air compressor has an oil-free design, preventing oil leakage, zero fault operation, and ensuring the safety of passengers. It adopts the world's leading scroll design (patent technology) to ensure the reliability of the scroll.
